WORK EXPERIENCE

Xtensus   **Jul. 2023 – Sep. 2023**
Front-end Engineer Intern   *Ariana, Tunis*
- Executed the transformation of an existing web application from a monolithic architecture to a modern microservices architecture following the Netflix Stack.
- Ensured cohesiveness and consistent feel across the application by implementing and maintaining a comprehensive design system.
- Prioritized an enhanced developer experience by establishing reusability for every page component & reducing the code required up to 90%.

Upwork   **Jun. 2023 – Aug. 2023**
Freelance Front-end Engineer   *Tunis, Tunis*
- Undertook the redesign of an existing app, with a primary focus on enhancing its user interface and overall user experience.
- Reduced page load times & maintained a lighthouse score of +92 in all of the pages.
- Optimized the user experience by creating a clear & simple design system while maintaining the branding.

Esprit Enterprise   **Jul. 2022 – Sep. 2022**
Software Engineer Intern   *Ariana, Tunis*
- I partnered to create an app for EspritOnLine, used by Instructors and Administration.
- Facilitated, collaborated, and conversation designed with 1 other intern during initial planning that was supervised by the CIO of ESPRIT.
- Assigned to make a visual annual activity report for instructors mainly used by the administration, to quantify each instructor's work activities.

PROJECTS

Collo - Collaboration & Project Management   **Jan. 2023 – May. 2023**
Academic Project - Esprit   *Ariana, Tunis*
- Led a team to design and build a productivity app using a tech stack that fits our goals.
- Orchestrated the project, including UI design and software architecture.
- Developed efficient systems to ensure team productivity, including steps to integrate work through PRs and organizing tasks with GitHub projects.
